SAFETY DATA SHEET
SODIUM METASILICATE PENTAHYDRATE

Issue Number : 14
Issue Date : 09/10/2017

1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier

Product name : Sodium metasilicate pentahydrate granules
Chemical name(s) : Disodium metasilicate pentahydrate, Disodium trioxyosilicate
Formula : Na$_2$SiO$_3$$
$\cdot$5H$_2$O
CAS no. : 10213-79-3
List no. : 600-279-4
EC no. : 229-912-9 (REACH registration)
REACH registration no. : 01-2119449811-37-0004

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified use(s): Industrial uses
Consumer uses
Professional uses

Uses advised against: None known

1.3. Details of the supplier of the safety data sheet

Adress: SILMACO NV
Industrieweg 90
B-3620 Lanaken
Belgium
Telephone: +32 (0)89/730 222
Fax: +32 (0)89/722 724
Email: info@silmaco.com

1.4. Emergency telephone number

SILMACO : +32 (0)89/730 222 (only during office hours)
Poison Center : +32 (0)70/245 245 (24/24h)

2. HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture

GHS Classification according to EC 1272/2008:

<table>
<thead>
<tr>
<th>Hazard classes/categories</th>
<th>Hazard Statements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Metal Corr. 1</td>
<td>H290: May be corrosive to metals.</td>
</tr>
<tr>
<td>Skin Corr. 1B / Eye Dam. 1</td>
<td>H314: Causes severe skin burns and eye damage.</td>
</tr>
<tr>
<td>STOT SE 3</td>
<td>H335: May cause respiratory irritation</td>
</tr>
<tr>
<td></td>
<td>Strongly alkaline. Causes burns.</td>
</tr>
<tr>
<td></td>
<td>Irritating to respiratory system.</td>
</tr>
<tr>
<td></td>
<td>May cause permanent damage to eyes.</td>
</tr>
</tbody>
</table>

Hazards summary:
2.2. Label elements (according to EC 1272/2008)

Hazard pictogram(s):

Signal word(s): Danger

Hazard statement(s):
- H290: May be corrosive to metals.
- H314: Causes severe skin burns and eye damage.
- H335: May cause respiratory irritation

Precautionary statement(s):
- P261: Avoid breathing dust/fume/gas/mist/vapours/spray.
- P262: Do not get in eyes, on skin, or on clothing.
- P280: Wear protective gloves/protective clothing/eye protection/face protection.
- P301+P330+P331: IF SWALLOWED: rinse mouth. Do NOT induce vomiting.
- P303+P361+P353: IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower.
- P305+P351+P338: IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

2.3. Other hazards

Not applicable

3. COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substances

Skin Corr. 1B/Eye Dam. 1 – H314 
STOT SE 3 – H335 |

4. FIRST AID MEASURES

4.1. Description of first aid measures

- **After eye contact:** Immediately flush eyes with eyewash solution or water (for 10 minutes). See an oculist.
- **After skin contact:** Rinse with running water and soap. Apply replenishing cream. Change all contaminated clothing.
- **After inhalation:** After inhalation of dust: seek medical advice.
- **After ingestion:** Rinse mouth and throat. Drink 1-2 glasses of water. Seek medical advice.

4.2. Most important symptoms and effects, both acute and delayed

⇒ Strongly alkaline. Causes burns.
⇒ Irritating to respiratory system.
4.3. Indication of any immediate medical attention and special treatment needed
Obtain immediate medical attention.

5. FIRE-FIGHTING MEASURES

5.1. Extinguishing Media
Suitable extinguishing media: Not applicable. Inorganic material. Non-combustible, therefore define extinguishing measures according to neighbouring conditions.
Unsuitable extinguishing media: Not applicable.

5.2. Special hazards arising from the substance or mixture
Not applicable. Inorganic material. Non-combustible.

5.3. Advice for firefighters
No particular measures required.

6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures
⇒ Avoid contact with skin and eyes, do not breath dust.
⇒ Wear suitable protective clothing. Wear eye/face protection. An approved dust mask should be worn if dust is generated during handling.
⇒ Danger of slipping on spilled product.

6.2. Environmental precautions
⇒ Do not allow to enter drains / surface water / ground water. Prevent the spreading of the product into the environment by diking with soil or other absorbent material
⇒ Contact the authorities in the event of large product spillage to water courses or sewage systems or if spillage has contaminated soil.

6.3. Methods and materials for containment and cleaning up
⇒ Collect as much as possible in a (clean) container for recovery or disposal.
⇒ Remove last traces by diluting with plenty of (warm) water

6.4. Reference to other sections
See also section 8

7. HANDLING AND STORAGE

7.1. Precautions for safe handling
⇒ Avoid creation of dust, do not breath dust.
⇒ Avoid contact with eyes, skin and clothing.
⇒ Wear protective equipment, see also section 8.
⇒ Eye wash facilities should be readily available.

7.2. Conditions for safe storage, including any incompatibilities
⇒ Keep packaging / storage vessel closed and dry
⇒ Protect packaging from freezing, rain or direct sun
⇒ Keep away from acids
⇒ Compatible materials : (Stainless) steel
⇒ Incompatible materials : Zinc, Tin, Aluminum, Cupper and their alloys
7.3. Specific end use(s)
None known

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1. Control parameters

<table>
<thead>
<tr>
<th>Substance</th>
<th>Occupational exposure limits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Disodium metasilicate</td>
<td>The derived DNEL for inhalation is higher than the existing OEL for dust, therefore long-term systemic effects caused by disodium metasilicate are not expected to occur as long as the OEL is complied with. The existing OEL (TRGS 900, June 2008) for dust is 3 mg/m³ (alveolar fraction) and 10 mg/m³ (respirable fraction).</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Derived No Effect Level (DNEL)</th>

8.2. Exposure controls

8.2.1. Engineering controls
Engineering methods to prevent or control exposure are preferred. Methods include process or personal enclosure, mechanical ventilation (dilution and local exhaust) and control of process conditions.

8.2.2. Personal protection

**Respiratory protection:** Avoid inhalation of dusts. Wear suitable respiratory protective equipment conforming to EN140 with type A/P2 filter or better if working in confined spaces with inadequate ventilation.

**Eye/face protection:** Wear suitable tightly fitting goggles.

**Skin protection:** Wear suitable protective clothing and alkaline resistant gloves (PVC, rubber or natural latex) tested according to EN 374.

9. PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties

- **Appearance** white granules
- **Odour ...** odourless
- **Odour threshold (ppm)** not applicable
- **pH (value)** > 12,0 (1% solution)
- **Melting/freezing point (°C)** ± 72 °C
- **Boiling point/ range (°C)** not applicable
- **Flash point (°C)** not applicable
- **Evaporation rate** not applicable
- **Flammability (solid, gas)** not applicable
- **Explosive limit ranges** not applicable
- **Vapor pressure (mm Hg)** not applicable
- **Vapor density (air=1)** not applicable
9.1. Other information
No data

10. STABILITY AND REACTIVITY

10.1. Reactivity
See section 10.3.

10.2. Chemical stability
Stable under recommended storage and handling conditions

10.3. Possibility of hazardous reactions
⇒ Aqueous solutions will react with aluminium, zinc, tin, cuppur and their alloys evolving hydrogen gas which can form an explosive mixture with air.
⇒ Exothermic reaction if in contact with acids

10.4. Conditions to avoid
Avoid prolonged contact with ambient air: hygroscopic behaviour may induce formation of lumps.
Avoid contact with concentrated acids.

10.5. Incompatible materials
Avoid contact with aluminum, zinc, tin, cupper and their alloys

10.6. Hazardous decomposition products
None known

11. TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects
Acute toxicity
All symptoms of acute toxicity are due to high alkalinity.
⇒ Ingestion: Material will cause chemical burns. Oral LD50 (rat): 1152-1349 mg/kg bw
⇒ Inhalation: Dust is severely irritant to the respiratory tract. Inhalation LC50 (rat) > 2.06 g/m³
⇒ Skin contact: Material will cause chemical burns. Dermal LD50 (rat) > 5000 mg/kg bw.
⇒ Eye contact: Material will cause chemical burns. May cause permanent damage if eye is not immediately irrigated.

Skin corrosion/irritation: Corrosive to skin.
Serious eye damage/irritation: Corrosive to eyes.
Sensitisation: Not sensitising (LLNA).
Carcinogenicity: No structural alerts.
Reproductive toxicity: Effects on fertility: NOAEL (rat) > 159 mg/kg bw/d.
Developmental toxicity: NOAEL (mouse) > 200 mg/kg bw/d.
STOT-single exposure: Irritating to respiratory system.
12. ECOLOGICAL INFORMATION

12.1. Toxicity
   ⇒ Acute fish toxicity (Brachydanio rerio): LC50 (96 hour): 210 mg/l
   ⇒ Acute invertebrates toxicity (Daphnia magna): EC50 (48 hour): 1700 mg/l
   ⇒ Algae / cyanobacteria (Scenedesmus subspicatus): EC50 (72 h, biomass): 207 mg/L, EC50 (72 h,
       growth rate): > 345.4 mg/L

12.2. Persistence and degradability
   Inorganic. Soluble silicates, upon dilution, rapidly depolymerise into molecular species
   indistinguishable from natural dissolved silica. They combine with ions like Ca, Mg, Fe, Al and others
   to end up as insoluble compounds similar to constituents of natural soils.

12.3. Bioaccumulative potential
   Inorganic. The substance has no potential for bioaccumulation.

12.4. Mobility in soil
   Not applicable.

12.5. Results of PBT and vPvB assessment
   Not classified as PBT or vPvB.

12.6. Other adverse effects
   The alkalinity of this material will have a local effect on ecosystems sensitive to changes in pH.

13. DISPOSAL CONSIDERATIONS

13.1. Waste treatment methods
   ⇒ Waste disposal according national or regional regulations, neutralisation prior to disposal is advisory
   ⇒ Dispose contaminated packaging according national or regional regulations,
     preliminary cleaning with water is advisory
   ⇒ EWC (European Waste Catalog) - number : 06 02 99

14. TRANSPORT INFORMATION

14.1. UN number
   3253
14.2. UN proper shipping name
   Disodium trioxosilicate
14.3. Transport hazard class(es)
   8
14.4. Packing Group
   III
14.5. Environmental hazards
   Not classified as a marine pollutant
14.6. Special precautions for user
   See title 7.2. for incompatible materials
14.7. Transport in bulk according to
   annex II of MARPOL73/78 and
   the IBC Code
   Not applicable
15. REGULATORY INFORMATION

15.1. Safety, health and environmental regulations/legislations specific for the substance or mixture.

15.2. Chemical safety assessment
A chemical safety assessment has been conducted. The results are summarized in annex. The annex covers workplace and consumer exposure scenario’s.

16. OTHER INFORMATION

The following sections contain revisions or new statements:
- Section 1.1.: added list number of sodium metasilicate pentahydrate
- Section 15.1: extended the overview of the listing in the national inventories

Sources of key data: IUCLID and CSR disodium metasilicate

DISCLAIMER OF LIABILITY: The information in this MSDS was obtained from sources we believe are reliable. However, the information is provided without any warranty, express or implied, regarding its correctness. The conditions or methods of handling, storage, use or disposal of the product are beyond our control and may be beyond our knowledge. For this and other reasons, we do not assume responsibility and expressly disclaim liability for loss, damage or expense arising out of or in any way connected with the handling, storage, use or disposal of the product. This MSDS was prepared and is to be used only for this product. If the product is used as a component in another product, this MSDS may not be applicable.
## ANNEX – EXPOSURE SCENARIO’S

### Section 1 Exposure Scenario Title

<table>
<thead>
<tr>
<th>Title</th>
<th>Workplace exposure to disodium metasilicate (EC 229-912-9) powders</th>
</tr>
</thead>
</table>

### Use Descriptor

| Sector of Use (SU) | 3 and 22 (including the supplementary SU’s 2a, 2b, 4, 5, 6b, 7, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 23) |
| Process Categories (PROC) | 1, 2, 3, 4, 5, 6, 7, 8a, 8b, 9, 10, 11, 13, 14, 15, 17, 19, 21, 22, 23, 24, 25, 26 |
| Environmental Release Categories (ERC) | 1, 2, 3, 4, 5, 6b, 6d, 7, 8a, 8b, 8c, 8d, 8f |

### Processes, tasks, activities covered

Manufacture and formulation of the substance as well as industrial and professional uses.

### Section 2 Operational conditions and risk management measures

If possible, local exhaust ventilation should be used. In addition, whenever disodium metasilicate as a substance on its own or in a preparation is handled outside closed systems, suitable personal protective equipment (gloves, goggles, dust masks or respirators) is the preferred and only measure of control.

### Section 2.1 Control of worker exposure

#### Product characteristics

| Physical form of product | solid, powder, vapour pressure 1.03 Pa (1175 °C) |
| Concentration of substance in product | Covers percentage substance in the product up to 100 %, unless otherwise stated. |
| Amounts used | No limit |
| Frequency and duration of use | Covers frequency up to: daily use, weekly, monthly, yearly, unless otherwise stated. |
| Human factors not influenced by risk management | Not applicable |

### Other Operational Conditions affecting worker exposure

Assumes a good basic standard of occupational hygiene is implemented. The work occurs inside as well outside.

### Contributing Scenarios

#### Risk Management Measures.

| PROC 1, 2, 3 | Handle substance within a closed system. No other specific measures identified. |
| PROC 4, 5, 6, 8a, 8b, 9, 10, 13, 14, 15, 17, 19, 21, 22, 23, 24, 25, 26 | Wear suitable gloves (tested to EN374) and eye protection. |

| PROC 7, 11 | Provide enhanced general ventilation by mechanical means. Wear suitable gloves (tested to EN374) and eye protection. or Wear a respirator conforming to EN140 with Type A/P2 filter or better. Wear suitable gloves (tested to EN374) and eye protection. |

### Section 2.2 Control of environmental exposure

Not required, as soluble silicates including disodium metasilicate do not meet the criteria for classification as dangerous to the environment according to 67/548/EEC (See Article 14.4 of REACH Regulation). Furthermore, as high production volume substances, soluble silicates have been reviewed to a great extent for their exposure potential to the environment and the possible risks arising from their release (Van Dokkum et al. 2002, OECD SIDS 2004, HERA 2005, and CEES 2008). It was concluded that soluble silicates are currently of low priority for further work because of their low hazard profile.

### Section 3 Exposure Estimation

#### 3.1 Health

When the recommended risk management measures (RMM) and operational conditions (OC) including personal protective equipment (PPE) are used, the exposure to powders of disodium metasilicate will be negligible. RMMs are based on a qualitative risk characterization.

### Section 4 Guidance to check compliance with the Exposure Scenario
4.1. Health

The implemented RMMs and OCs including PPE will ensure that workers’ exposure is reduced in a way that health hazard effects are avoided and that the risk is considered to be adequately controlled.

</tr>
</tbody>
</table>

**Product Category**

| Specific Risk Management Measures (RMM) and Operational Conditions (OC) (only required controls to demonstrate safe use listed) |
|---|---|
| PCs - general case | OC |
| In consumer products the irritation hazard of soluble silicates is addressed, if necessary, by appropriate labelling and the advice to use (household) gloves on the consumer product. In general, dermal, inhalation and oral consumer exposure to commercially available products is minimised due to formulation (limited concentration of soluble silicates, particle size distribution, agglomeration and dust potential, tablets and gels), packaging and bad taste of commercially available products. |
| RMM | No specific RMMs identified beyond those OCs stated. |

| PC 1, 3, 8, 9a, 9b, 9c, 15, 16, 17, 31, 34, 35, 39 | OC |
| Covers use up to 365 days/year; covers use under typical household ventilation. | RMM | No specific RMMs identified beyond those OCs stated. |

**Section 3  Exposure Estimation**

**3.1. Health**

Some product uses could result in local irritation (skin and eyes) if highly concentrated products, which is usually not the case, are used. This hazard is addressed, if necessary, by appropriate labelling and the advice to use household gloves on the consumer product. In general, dermal, inhalation and oral consumer exposure to commercially available products is minimised by formulation measures (use of limited concentrations, reduction of dust potential by agglomeration or use of tablets and gels), bad taste of the products, packaging devices (sealing of tablets, child-resistant fastenings) or denaturing.

**Section 4  Guidance to check compliance with the Exposure Scenario**

**4.1. Health**

Besides the product integrated RMMs, consumer instructions and the communication on the safe use should be implemented, including technical use instructions, instructions on use of protective clothing and behaviour, storage and disposal instructions. The implemented risk mitigation measures will ensure that consumer’ exposure is reduced in a way that health hazard effects are avoided and that the risk is considered to be adequately controlled.
